CLASSIFICATION OF RECEPTOR			OPERATIONAL STAGE																									
Location - 200m SW of new interchange. AOD 30m (Approx)	Mid/Far Distance - The existing vegetation of garden trees/shrubs/hedges creates dominant skyline (left to centre) Roadside mature planting (A725/B7071) limits views of vehicular movements beyond. Partial distant views over towards orbiston on the skyline.	Minimal views over road development because of existing seasonal screening adjacent to clyde view. conservation existing vegetation screens impact of road development of A725.																										
Sensitivity : - High/Moderate			15 YEARS FROM OPERATION (LONG TERM)																									
		Impact upon the viewpoint is minimal, some vehicular effects from road users of the A725 are seen at intermittent points where the existing seasonal vegetation cannot screen light and associated vehicular effects, as in baseline scenario.
