

## Appendix A8.7: Noise Sensitive Receptors Nearest to Construction Works

### 1 Introduction

- 1.1 As stated in paragraph 8.4.7 of Chapter 8 (Noise and Vibration), there are 64 noise sensitive receptors (NSRs) within 100m of the draft CPO boundary for the proposed scheme that may have potentially significant construction noise impacts.
- 1.2 It should be appreciated that although these NSRs have been highlighted, they may not be subject to significant construction noise impacts as this will be dependent on the pre-existing ambient noise levels and the type of construction activity taking place in the vicinity of the NSRs.
- 1.3 Table 1 provides a list of the identified NSRs within 100m of the draft CPO boundary.
